The Natural Sea Sponge Company

Our Story

The Natural Sea Sponge Company is the largest importer and Manufacturer of Natural Sea Sponges in the U.K. and has a rich heritage in embracing the traditional methods of sea sponge fishing and manufacturing. After many years of trading, we became a limited company in 1996 and continue to be fully committed to maintaining the high standards of the industry in order to bring you the finest, ethically sourced sea sponges. We offer an extensive selection of sea sponge varieties and distribute world-wide.

Responsible Sourcing

We work closely with registered divers in Greece and Tunisia to ensure that our sea sponges are carefully harvested with minimal disturbance to their natural environment. Our sponges are cut by hand in order to preserve the vital root system which promotes and supports the regenerative process of new, healthier, stronger sponges. All sponges are carefully inspected and certified by The Ministry of Agriculture and Fisheries.

Hand Processed

Our Natural Sea Sponges undergo a 42 stage production process by hand using traditional methods, the majority of which is carried out in our U.K. Warehouse. We take great pride in applying uncompromising standards for quality control to ensure that our sponges reach you in optimum condition.

The Hydréa London Brand

The Natural Sea Sponge Company launched their affiliate brand, Hydréa London in 1997. A brand born to create consciously crafted bodycare product innovations whilst sharing the same guiding principles for sourcing as The Natural Sea Sponge Company.

Our Objective

Our Hydréa London products have been created with the intention of elevating bodycare rituals so you can enjoy performing restorative spa treatments at home. We take great pride in designing and crafting our products with exceptional attention to detail, ensuring maximum product efficacy for spa worthy results, whilst continuing to embrace our passion for naturally innovative, ethically sourced materials.

Worldwide Stockists

The Hydréa London Brand is stocked worldwide in an abundance of high-street stores, established department stores and popular online retailers as well as being a trusted supplier to the professional spa and beauty industry. We distribute our Hydréa London Brand Worldwide including Europe, United States, Australia, Canada, Asia, Russia, The Middle East and Japan.

Organic Egyptian Loofah Collection

Hydréa London uses only 100% superior Egyptian loofah, unlike many of our competitors who use the harder Chinese loofah. Egyptian Loofah is highly recommended by professionals for effective skincare due to its thicker, flexible fibres that soften and expand when wet. The looser weave creates plenty of lather and dries quickly which has the added benefit of preventing bacteria from lurking! The natural fibres give skin a soft, smooth glow without being too harsh.

What Is Loofah?

What is loofah? Loofah is a versatile vegetable and relative of the cucumber which grows on vines. When it is fully grown it is harvested and left in the sun to dry until only the hard skeleton remains – this is one of nature's best exfoliators. Our loofah is organically farmed in Egypt where the nature of the land produces the best quality loofah available on the market. Our loofah is 100% organic, sustainable and biodegradable.

BENEFITS

The unique loose weave texture helps to buffs away dead skin cells allowing moisture and active skincare ingredients to penetrate. Helps in the prevention of in-grown hairs. Helps to reduce the look and feel of cellulite.

Helps to naturally stimulate the lymphatic system to promote detoxification and lymphatic flow. Helps prevents toxins/fluids becoming trapped in the fatty layers of skin.

Unblocks pores and washes away impurities for fresher, brighter, clearer looking skin. Reduces the appearance of puffiness, imperfections and blemishes for beautiful looking skin.

Promotes general well-being of the skin as well as aiding relation. Aids skin conditioning through massage and reduces the appearance of imperfections and blemishes.

Helps to prevent signs of aging. Energises the look of the skin for a healthier, younger looking appearance.

HOW TO USE

Use in the Bath or Shower. Wet the Loofah and use with your favourite cleansing product. Massage in circular motions towards the heart. The Extra Soft, Unbleached Egyptian Cotton side can be used for gentle, daily cleansing.

LOOFAH CARE

After each use, rinse the loofah thoroughly in fresh water. Shake out any excess and leave to dry naturally by the hanging loop away from moisture.

Hydréa London Organic Egyptian Loofah Collection

LMT4 LOOFAH SPA MITT WITH CUFF

A Large, Dual Sided Spa Mitt with an elasticated cuff to keep the Mitt in place on your hand. The Loofah side is used for all over body exfoliation. The reverse side of Soft, Unbleached Egyptian Cotton is perfect for everyday gentle cleansing.

Exfoliating Collection

Our Hydréa London Exfoliating Mitts and Gloves are expertly designed and crafted with naturally innovative materials that work to leave your skin feeling silky smooth and looking beautifully radiant.

Exfoliating Strength

We understand that your skin type is unique, which is why we have developed and designed a range of mitts and gloves with various exfoliating strengths, from gentle through to coarse which can give you the confidence to ensure you can choose the perfect match for your skins needs.

EXFOLIATING STRENGTH
GENTLE 1 2 **3** 4 5 COARSE

EXFOLIATING BENEFITS

Buffs away dead skin cells allowing moisture and active skincare ingredients to penetrate. Helps in the prevention of in-grown hairs. Helps to reduce the look and feel of cellulite.

Helps to naturally stimulate the lymphatic system to promote detoxification and lymphatic flow. Helps prevents toxins/fluids becoming trapped in the fatty layers of skin.

Unblocks pores and washes away impurities for fresher, brighter, clearer looking skin. Reduces the appearance of puffiness, imperfections and blemishes for beautiful looking skin.

Promotes general well-being of the skin as well as aiding relation. Aids skin conditioning through massage and reduces the appearance of imperfections and blemishes.

Helps to prevent signs of aging. Energises the look of the skin for a healthier, younger looking appearance.

EXFOLIATING TIPS

Exfoliate your skin once or twice a week. Whilst it's important to buff away those dead skin cells excessive exfoliation can strip your skin of your natural oils.

Use small circular motions and don't scrub too hard. Never exfoliate sensitive areas or broken skin.

The morning is the best time to exfoliate to give your skin a fresh, radiant glow as well as providing a natural energy boost to body and mind.

After exfoliating, finish by applying your favourite moisturiser or body oil. Buffing away those dead skin cells makes it easier for your skin to absorb product for maximum benefits.

Applying fake tan? Exfoliation is a vital pre-tanning step. Removing dead skin cells ensures you have a smooth skin surface ready for fake tan application for an even finish.

Body Brush Collection

Our Hydréa London Body Brushes are consciously crafted with FSC® Certified Beechwood or Eco-Friendly Bamboo Wood. All our brushes are of the highest quality using specially heat treated timber and finished with double waxing to protect the wood.

What Does FSC® Certified Mean?

This stands for Forest Stewardship Council. The FSC system allows businesses and consumers to identify, purchase and use wood, paper and other forest products made with materials from well-managed forests and/or recycled sources. FSC's "tick tree" logo is used to indicate that products are certified under the FSC system. When you see the FSC logo on a label, you can buy forest products with confidence that you are helping to ensure our forests are alive for generations to come.

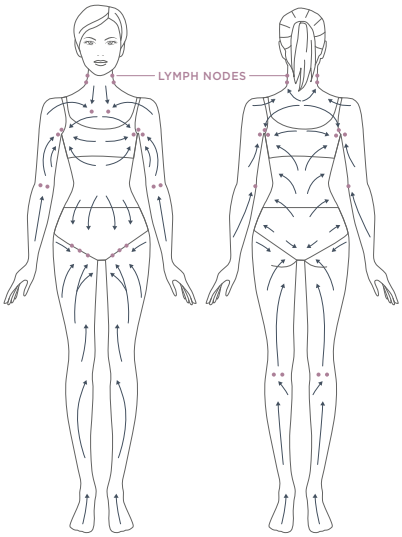
MASSAGING



DRY BODY BRUSHING BENEFITS

Sweeps dead skin cells, unblocks pores, prevents in-grown hairs and encourages a healthy skin cell turnover for beautiful, glowing skin. Helps to reduce the look and feel of cellulite.

Regular dry body brushing helps to stimulate the lymphatic system which kick-starts the detoxification process to naturally eliminate impurity build up within the body and skin.

Unblocks pores and washes away impurities for fresher, brighter, clearer looking skin. Reduces the appearance of blemishes and imperfections for beautiful looking skin.

For an uplifting start, begin the day with Dry Body Brushing first thing in the morning before your shower, which provides an energising boost to the skin, body and mind.

The natural massaging and sweeping action of dry body brushing encourages blood flow to the surface of the skin which naturally flushes the skin tissue with essential nutrients.

HOW TO USE

Use your body brush on dry skin with soft sweeping motions. The arrows on the illustrations show the directions to brush in order to help improve lymphatic flow. Never scrub the skin, always let the brush do the work. Do not use on sensitive areas or broken skin. After brushing, finish with a luke warm shower to wash away dead skin cells. Pat your skin dry and finish by applying your favourite body oil or moisturising lotion.

BRUSH CARE

Tap the brush after each use to remove dead skin cells. Wash the bristles occasionally in warm soapy water, rinse well and shake out excess water. Leave to dry naturally. Store away from moisture.

Professional Body Brush Collection

Recreate a home spa experience with our Professional Body Brush Range. Consciously crafted with FSC® Certified Beechwood and available with Natural Bristle or Cactus Bristle.

Premium Olive Wood Collection

Olive Wood is a premium quality wood which boasts a beautiful and distinct grain. Noted for its deep, rich colour and contrasting patterns, Olive Wood is favoured for its beauty, strength and versatility.

WATER + STAIN + ODOUR RESISTANT

SUSTAINABLY + ETHICALLY SOURCED

SUSTAINABLY SOURCED

Aside from its natural beauty, olive wood is a sustainable resource making it a very eco-friendly choice. The trees are often used as a by-product of the agriculture industry and are not listed as a threatened species. Olive wood used commercially today is sustainably sourced from pruning branches or non-fruiting trees.

UNIQUE BEAUTY

Due to the unique colours and grain patterns no two pieces made from Olive Wood will look exactly the same.

Bamboo Bodycare Collection

Our Bamboo Bodycare range is blended with bamboo fabric which is plant derived from Moso Bamboo. The fabric is super soft to the touch and feels luxurious against the skin.

NATURALLY ECO-FRIENDLY

Bamboo thrives without the need for chemicals and is the fastest growing plant on Earth. Moso Bamboo can grow almost a single metre in a day therefore making it a sustainable and eco-friendly resource. When harvested the root system is left untouched to allow for rapid regeneration.

DID YOU KNOW...

Bamboo absorbs more carbon dioxide and releases more oxygen than an equivalent mass of trees.

Facial Brush Collection

Discover the art of Dry Facial Brushing for a glowing and radiant complexion. Dry brushing is an ancient Ayurvedic tradition and some swear by it to give them a natural glow with an invigorating energy boost. Facial Brushes are used on dry skin after cleansing for a multitude of benefits and is easy to incorporate into your self-care face ritual once or twice a week. The bristles on facial brushes are much softer than on body brushes making them suitable for the delicate facial areas.

EXFOLIATING

DETOXING

INVIGORATING

MASSAGING

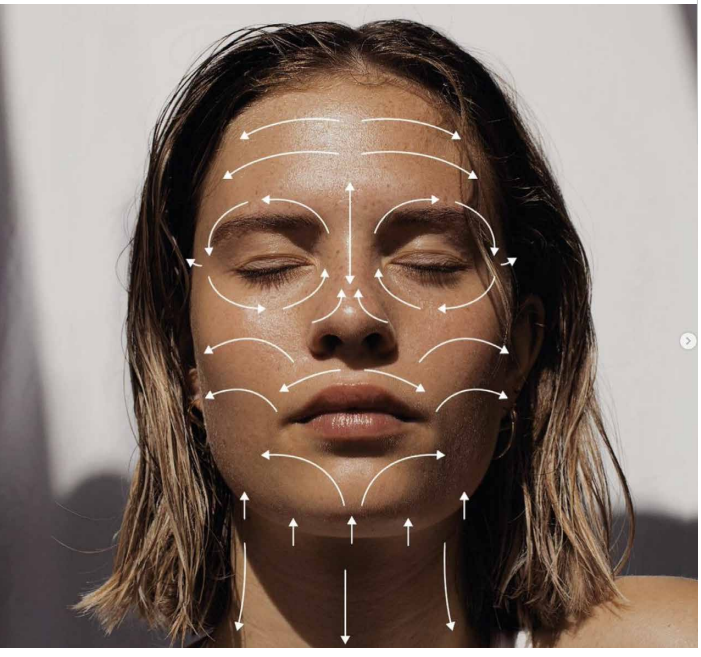
EXFOLIATING BENEFITS

Gently exfoliates and buffs away dead skin cells and unblocks pores revealing a softer, brighter, radiant complexion.

Helps to naturally stimulate the lymphatic system to promote detoxification and lymphatic flow.

Naturally stimulates the circulatory system which helps to flush the skin tissue with essential nutrients.

The gentle massaging action helps to relax and relive facial tension.



HOW TO USE

Thoroughly cleanse your skin to remove make up and impurities then pat dry with a soft facial cloth. Use your brush on dry skin using short flicking motions. Follow the direction of the arrows on the illustration opposite for a spa worthy treatment. Do not scrub the skin, let the brush do the work.

BRUSH CARE

After each use, clean the bristles in warm soapy water, rinse the bristles thoroughly and shake out excess water. Leave the brush to dry with bristles facing down on a dry surface.

Nail Brush Collection

Our Hydréa London Wooden Nail Brushes are FSC® Certified and combined with either Natural or Cactus Bristle which is flexible enough to clean under the nails but firm enough to remove stubborn dirt.

Recommended by Celebrity Manicurist

Our Nail Brushes have been recommended by Celebrity Manicurist, Michelle Humphrey. *'Nail brushes are so underrated – Hydréa London Beechwood Brush is my favourite. It has two different lengths of bristles and I use it to push my cuticles back when I'm overdue for a manicure. They're also brilliant for cleaning under and around your nails. They can completely overhaul the appearance of your nails – a scrub is never enough. Use it in the shower and run it over your toes, too. Make sure the brush has stiff bristles for best results'.*

NAIL BRUSH BRISTLE TYPE

CACTUS

Plant based and Vegan Friendly. Cactus Bristle is naturally firm. The Stiff Bristles effectively remove stubborn dirt from underneath and around your nails as well as exfoliating on your hands and feet.

MANE + CACTUS

If you find Cactus Bristle too coarse, try a combination of Cactus and Mane (Horse Hair) Bristle. This unique bristle mix is still effective at removing stubborn dirt but a little softer on the hands.

NATURAL

The Natural Bristle used for our Nail Brushes is ethically sourced Hog Hair which is characterised by it's stiffness and elasticity which creates an effective, flexible clean.

NAIL CLEANING TIPS

Make sure your hands are nice and moist before using the nail brush. If you only rinse your hands quickly this can damage the nail bed.

The shorter, stiff bristle on the top of the nail brush is excellent for removing stubborn dirt underneath and around the nail area.

The longer bristle, underneath the nail brush helps to exfoliate the hands and soften cuticles and stimulate the nail bed for healthy growth.

NAIL BRUSH CARE

Always rinse the bristles after use, shake out excess water and place with the main bristles facing down away from moisture.

Professional Natural Foot File

The Ultimate Foot File. Consciously Crafted with FSC® Certified Beechwood and coated with 360º Ceramic Micro Crystals for effective removal of rough calluses and hard skin on your feet. The uniquely designed curve works in harmony with the contours of your foot for ease of use and maximum results.

Natural Volcanic Pumice

Pumice is a type of volcanic rock that is formed when lava comes into contact with water. As soon as the lava touches the water it begins to cool rapidly and changes almost immediately to a solid form with bubbles trapped inside, therefore creating a porous rock creating the ideal texture for exfoliating and removing rough skin from your feet and hands.

NATURAL SEA SPONGE

- Natural Product + 100% Biodegradable
- Suitable For Sensitive Skin
- Suitable for Babies' Skin
- Hypo-allergenic
- Durable
- Creates a Luxurious, Rich lather

NATURAL SEA SPONGE COLLECTION

Natural sea sponges are a biodegradable renewable natural resource. Scientific studies have confirmed that regular harvesting of the natural sponges enhances the health and population. We carefully monitor our divers who carry special licences to fish for sponges. All the sponges are inspected by the relevant Ministry of Agriculture and Fisheries to be certified for export. The divers harvest the sponges individually by cutting the sponge at the base, leaving the 'roots' intact and enabling the sponge to regrow. Sponges also have the ability to regenerate from the smallest fragment so when the sponges are disturbed by the divers moving on the sea bed they release cells and multiply. Areas that are fished from sponges will have a larger sponge population that one that is not.

We continue to use the old traditional methods of the sponge industry to process, measure and prepare sponges for sale. We carefully monitor every stage in the production of natural sponges from the sourcing by our divers to the packaging of the final product. Our sponges under go 42 stages of processing by hand and the final stages are always carried out in our warehouse in the U.K. This ensures we have complete quality control from beginning to end.

CHOOSING A SEA SPONGE

FOR BATHING

The best size sea sponge for bathing is between 5 - 7 inches.

FOR BABY

The best size sea sponge for babies' skin in 3 inches.

FOR COSMETIC/FACIAL USE

The best size sea sponge for cosmetic and facial usage is 2.5 inches

SEA SPONGE CARE

After each use, rinse the Sea Sponge thoroughly in warm water until no soap residue remains. Gentle squeeze out excess water, do not wring or twist as this can damage the sea sponge. Leave to dry naturally away from moisture. Do not bleach, boil or machine wash.

Deep clean your sea sponge once a month by soaking it in a solution of one part warm water and one part white wine vinegar for up to one hour, or a couple of drops of Citricidal – a natural antibacterial agent made from grapefruit seeds. Rinse well and set the sponge out to air dry. This will keep the sponge fresh and inhibit the growth of bacteria.

As this is a natural product sponges should be checked your sponge before use for any sea debris.

HONEYCOMB | HC/W + HC/N

Honeycomb sea sponges are the finest quality of natural sponge available as they are silky soft, highly absorbent and create a luxurious lather. This is because they are gathered from the Mediterranean where the cooler sea temperature and greater depths create very strong dense sponges. These sponges can last 2 years + with normal care. Sustainably harvested in Mediterranean Sea and hand processed in the U.K.

WOOL | BW/W

This luxurious Sea Wool sponge is super soft and perfect for working up a rich lather for bath and shower body cleansing. These sponges can last 6 months to 1 year with normal care. Sustainably harvested in Caribbean Sea and hand processed in U.K.

GRASS | BG/W

This is an inexpensive option of natural sea sponge sustainably harvested from the Bahamas and still perfect for bathing. These sponges will last up to 6 months with normal care.

FINA SILK | FS/W + FS/N

This silky soft sponge is super absorbent, hypo-allergenic and excellent for use as part of your daily face care routine. The shape and texture of this natural sponge make it ideal for applying foundation for flawless, long lasting results and deep cleansing those hard to reach area around the eyes and nose. Fina Silk sponges are also perfect for gently cleansing babies' delicate skin and are an ideal small size for cleaning in the creases of babies skin.

Luxurious Shower Cleansing

Our Hydréa London Luxury Bath Buffers are crafted with dense layers of mesh which create the ideal texture for daily cleansing and gently exfoliation. Add a small amount of your favourite cleansing product to create a rich, sumptuous lather.
